

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants : BENTZ, Gregory R. et. al.
Appl. No. : 10/536,745
Filed : May 27, 2005
Title : METHOD FOR GENERATING INTERPRETABLE CODE FOR
STORAGE IN A DEVICE HAVING LIMITED STORAGE

Grp./A.U. : 2194
Examiner : JORDAN, Kimberly L

Docket No. : 13210-209

March 5, 2010

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

INTERVIEW SUMMARY

Applicants thank Examiner Jordan for her efforts to expedite prosecution of the present application. In a telephone interview between Examiner Jordan and Applicants' Representative (Kendrick Lo) held March 5, 2010, potential amendments to the independent claims were discussed in order to enhance clarity. For example, in claim 1, it was suggested that "configured to execute software for generating" be replaced with "configured to generate". It was further suggested that the phrase "the Java Virtual Machine for resolving" be rephrased so that the term "for" is not used. Analogous amendments to the remaining independent claims were also proposed.

Without prejudice and to expedite prosecution of the application, Applicants' Representative agreed with the Examiner's proposed amendments and suggested further amendments to enhance clarity and readability of the claims.

Respectfully submitted,
BERESKIN & PARR LLP/S.E.N.C.R.L., s.r.l.
